

Karen Fusaro

*Senior Vice President,
Clinical Development*

Karen is a Senior Leader with over 25 years of clinical research experience leading cross functional global teams, overseeing clinical programs, designing clinical trials and executing plans that bring assets from early phase trials to approval. Proven track record for driving innovations, building, and retaining high-performance teams and strategic planning to ensure quality data, decreased timelines and reduced budget. Large Pharma and small biotech experience across multiple indications with multiple FDA and EMA approvals in infectious diseases.
