

Gary Ferguson, MD

Scientific Advisory Board Member

Gary Ferguson, MD is a member of the Altesa Scientific Advisory Board. He is a graduate of the University of Washington School of Medicine. He received his postgraduate training at the University of Washington and then at the University of Colorado Health Sciences Centers, specializing in pulmonary and critical care medicine. After completing a research fellowship at National Jewish Center for Immunology and Respiratory Medicine, Dr. Ferguson joined the faculty of the University of Colorado and National Jewish Medical Center as Director of the Emphysema/COPD program. He continued his academic career at Wayne State University School of Medicine and then at Michigan State University. Dr. Ferguson is currently Clinical Professor of Medicine at Michigan State University and Director Emeritus of the Pulmonary Research Institute of Southeast Michigan. He is board certified in Internal Medicine, Pulmonary Medicine and Critical Care Medicine and is a Fellow of the American College of Chest Physicians. He has repeatedly been selected to America's Best Doctor's. Dr. Ferguson's research interests focus predominantly on airways diseases, primarily chronic obstructive pulmonary disease (COPD) and asthma. He has published extensively in peer review journals and textbooks and has lectured nationally and internationally in his fields of interest. He is on the editorial board of the Journal COPD and regularly reviews research for several journals and national granting agencies.
